Rowan College
       of South Jersey

Policy: 3009
Title: **PROGRAM REVIEW**
Area: Academic Services
Approved: 07/01/19
Reaffirmed: 12/13/22

Program Review is a process that evaluates the status, effectiveness, and progress of academic and non-academic programs and serves to identify the needs, priorities, and future directions of those programs. It is intended to enhance the quality of programs and assist in determining their ability to respond to future challenges and opportunities.

Program Review includes a data-driven, in-depth analysis of a program's past performance that is used to inform decision-making in relation to strategic and budget planning, and resource allocation. Program Review is integrated with regional and specialized accreditation processes, student learning outcomes assessment, and departmental action plans to guide the development of programs on a continuous basis.

The President will have administrative procedures developed in consultation with faculty, administrators, and other appropriate members of the College community.
